
Neonatal/Perinatal Medicine

Our NICU nurses are highly experienced and exceptionally well trained. They care for all the infants and provide care, support, and education to the parents as well. Our lactation consultant is available to help mothers learn how to establish and maintain their milk supply, and overcome obstacles to breastfeeding. There is also a support group for parents of children in the NICU. For more information, call (718) 240-6598.
